Initiatives & Activities

GEORGE BROWN COLLEGE   Toronto, ON
Web Application Development   January 2022 – Current
Built scalable web-based applications, including back-end database storage systems and dynamic pages using a handful of resources such as ASP.NET MVC, Microsoft .NET Framework, and C#. Including technologies and tools, such as HTML, CSS, GitHub, and Azure; that helped to own the functionality of the product from design to production, while resolving any issues along the way.

Open-Source Development   January 2023 – Current
Developed and performed Python programs implementing the OOP concepts and demonstrated the process of using data structures to generate content to standard output and files. Installed enhancements to improve user experience.

Application Development using Java   May – December 2022

Supervised the design and execution of console and graphical user interface applications using Java and SQL. Engaged with teammates to collaborate on the best solutions to fit the needs and requirements of the project. Delivered in a timely matter a structured and well object-oriented program following Agile and Scrum software development methodologies.

Language Skills & Interests

Language: Proficient in English & Spanish
Interests: Football, Tennis, Chess, and outgoing activities.
